RUBBERS!

THE OLD RELIABLE

Boot and Shoe House

-OF-

KERR & JERMIN,

Is always to front with the largest and best assorted stock of FIRST QUALITY Rubbers and warm Foot-wear to be found in the city, in all sizes, for

Ladies, Gents, Misses and Children,

At reasonable prices for honest goods. It will pay you to see our lines before you purchase.

KERR & JERMIN.

334 Dock St., McRae Block.

MALLOY'S.

What to get for the NEW YEAR'S DINNER is an important question just now. When you have decided, come to us and we will show you the largest assortment and finest quality of eatables to be found on the market. We have delicacies from every part of the world, from Alpena Celery to Dahesia Table Raisins.

IN CANNED GOODS.

Imported French Asparagus, Paris Sugar Corn, Gilt Edge Early June Peas, Boston Baked Beans, Imported Mushrooms, Monarch Spinach, and other kinds too numerous to mention.

IN FRUITS.

We have Apples, hand picked Baldwins, Northern Spy, Greenings and Snows, Florida Oranges, Messina Lemons, Malaga Grapes, Bananas, Figs, Dates, Prunes, Prunells, Orange, Citron and Lemon Peel. Five kinds of Raisins.

EVAPORATED FRUITS.

California Fruits put up in heavy syrup; also, all other brands of canned fruit.

All sorts of canned Meats, Fish, Soups and Sauces. We have Olives, Olive Oil, Cheese of all kinds, from Pine Apple to Limburg, Jellies and Preserves, Nuts and Candies, Cider, Boiled Cider, Mince Meat, Crackers and Wafers, Bread, Confections, Teas and Coffees, etc., etc., in fact, no matter what you want in the line of First Class clean goods,

MALLOY'S

Is the place to buy them.

To the Country Trade.

I will pay the highest prices for Eggs, Butter and other Farm Produce. FARMERS GIVE ME A CALL.

Call in the Legal Tender Notes.

As long as the present condition of the currency shall exist, with the government borrowing gold to redeem its notes and re-issuing the notes and redeeming them again whenever there may be a demand for gold at home or abroad, the banks can continue to pursue their present policy—which amounts to a suspension of gold payment—and the treasury can only defend itself by further borrowing.

There is only one honorable and safe way out of this coil. That is to fund the floating debt, and call in the greenbacks and treasury notes and destroy them. Any other course is to make slow progress toward partial repudiation and such commercial and industrial revulsion as would be involved in a failure of the public credit.—Philadelphia Record.

JOHN BOYD THACHER A WITNESS.
He Fully Verifies a Disputed World's Fair Award.

John Boyd Thacher is laconic and decisive in his statements.—During the lively campaign just closed in New York, this marked him especially as chairman of the Democratic State Committee. It was equally true of him as chairman of the Executive Committee on Awards at the World's Fair. This is the positive and sententious way in which he verifies in an official letter, the honors won by Dr. Price's Baking Powder: "I herewith enclose you an official copy of your award, which in due time will be inscribed in the diploma and forwarded."—Thus the question respecting the award, raised by an envious New York rival, is settled beyond cavil. This same rival by the way is widely advertising an award for itself. The official records prove this claim wholly false as they show the New York pretender was not so much as an exhibitor at the World's Fair.

As an illustration of the economy of the Republican administration of Michigan, we quote below from the Detroit Journal, which surely is not a Democratic source. Reader, bear in mind that state taxes for the last two years are higher than ever before, and yet the treasury is empty:

Auditor-General Turner came in from Lansing on Saturday night with the startling statement that the state treasury was empty and must be replenished at once. His first visit was to the Wayne county auditors where he demanded a portion of the tax due the state from this county.

"But it is not due until March," was the reply of Auditor Bart, the only one on deck.

"That doesn't cut any figure," was Turner's reply. "We are out of money and must have it. Wayne county has helped the state out of a hole before and she will have to do it again."

This morning the auditors had a conference, and voted to advance the state \$75,000 on its share of the taxes now being collected.

The Private Soldier.

Capt. Charles S. Morton, U. S. A., who has been in charge of the recruiting station at Milwaukee some time, is at the Elbitt and will soon leave for Fort Sill, in the Indian Territory.

"There never was a time," said the captain, "when so many men applied for enlistment in the army. Hundreds have tried to get in and been rejected because there was no need of them. The result has been that we have been able to pick the very best men, and only first class material stood any show of entering the service. Applicants who could not pass a strict physical examination and whose moral characters were unsatisfactory were turned down. Men who wanted to re-enlist were, of course, given the preference, as there is every advantage in taking a man who has been tested and who desires to continue in the army to accepting new recruits. The cutting down of the enlistment period from five to three years has been of marked advantage. The common soldier of the United States is a distinctly higher grade man than he was some years ago. His environment has changed for the better. Though his pay is the same all the conditions of his existence are improved, and, really, though the life is somewhat monotonous, there is a little of hardship in it, and there is always a chance for promotion."—Washington Post.

SHOULD THE GOVERNMENT ACT TO Suppress Fraudulent Advertisements of World's Fair Awards? Letters from both the Chief of Awards (on Agriculture) at the Chicago World's Fair, Mr. J. S. Browning, and the Judge of Awards on Baking Powders, expose the falsity of the claim made in behalf of a Chicago baking powder that it received the highest award for leavening power, keeping qualities, purity and general excellence.

The Judge of Awards says that this claim is false, that no such award was given to that baking powder.

Mr. Browning in his letter already published also shows that there was no award given to the Chicago company for the best baking powder.

It now appears further that the analyses of the powders exhibited showed a baking powder made in New York altogether the superior of the Chicago powder in both purity and strength.

The Government has prohibited the use for advertising purposes of the medals awarded by the Fair. It would be a great protection to the

public if the Government would also prohibit the publication of false claims such as those that have been exposed in relation to such awards.

The only official competitive test of a national character, from which consumers can obtain the actual facts as to the relative values of all the principal brands of baking powders of the country, is that made by the Agricultural Department at Washington, D. C. It so happens that this was conducted by the same eminent chemist who acted as judge of Awards at the Chicago Columbian Fair. As has already been published at this examination, the Royal Baking Powder was found to be the superior and highest in leavening strength.

Submarine Cables.

There are now twelve transatlantic cables connecting Europe with Canada and the United States, and steps have been taken to lay a cable across the Pacific, from British Columbia to Australia by way of the Fiji Islands. The circle of the earth will then be completed, but not so directly as would be by cable from America to Japan.

There are now 152,000 miles of submarine cable, in round numbers, of which 10 per cent have been supplied by various governments and the rest by private enterprise. They connect into one system over 2,000,000 miles of wire, ramifying in different countries. The cables have cost about \$40,000,000 sterling, but the money has been well spent, for the benefits of the telegraph are incalculable.

It controls the commerce of the world, which has risen to nearly \$4,000,000,000 sterling a year, or more precisely \$1,940,000,000 sterling of exports and \$1,720,000,000 sterling of imports. It enables international disputes to be settled without recourse to arms, as in 1881, when the British cabinet was in direct communication with the Boer leaders of the Transvaal. It brings a war that has broken out to a speedy conclusion, and keeps the public informed as to its hourly progress, as in the case of Egypt, where the bombardment of Alexandria was known in London a few minutes after the first shot was fired, and telegrams were dispatched from the battlefield of Suakin, in the eastern Sudan, while the fight was going on.

Above all, by putting the remotest parts of the world in contact with each other, it tends to destroy barriers of nationality and prejudice, making sympathy give place to sympathy and hatred to loving kindness.—Ex.

The Education of the Blind.

The Midland Republican of Dec. 7, says:

"Samples of cookies and biscuit, made by girls totally blind, can be seen at the Republican office. These samples are from some that were taken Tuesday from the school for the Blind (at Lansing) to Adrian for exhibition in connection with the convention there of the State Board of Corrections and Charities. A hammock and various samples of needle work made by the children at the school, were exhibited, also a book of raised point letter (Braille) which was stereotyped and printed at the school, and best of all, four of the children were there, two girls and two boys, who read from the books and the stereotypes by their fingers, played the piano, sang, wrote Braille from dictation, gave recitations, etc., arousing great interest in those who saw and heard them. They were under the immediate care of Supt. Church and a lady teacher, and remained through the entire convention, also visiting the industrial home for girls. The children enjoyed the change from school routine immensely and sat with great patience through the long sessions, in which some most valuable papers and discussions were given."

Hon. L. C. Storrs, Secretary of the State Board of Corrections and Charities, says that the school for the Blind was never in better condition than now.

This school is a state institution and is located at Lansing. Blind children are boarded and taught free of charge. Further information may be obtained by addressing the Superintendent of the School for the Blind, Lansing, Mich.

Any person knowing of a blind child, or one so nearly blind as to be unable to learn in the public schools, should encourage the parents or guardian to have such child sent to the school at Lansing.

Cottlene Trade-Mark.

An important and interesting trade-mark suit, which has been before the courts for some time, has recently reached a decision in the United States Circuit Court for the southern district of New York. Judge Townsend presiding. The evidence shows that the word "Cottlene" is not formed in accordance with any established rules for the formation of a new word. Cott is merely suggestive of cotton oil. It does not describe it, and also may describe or refer to oleomargarine, as well as to oleostearine, or to other oils. Oleo is ordinarily used as a suffix, and it is shown to be the rule in coining compound words that the name of the more important article is placed last.

There were various other words in common use in describing the product when the defendant coined the word. It does not, therefore, come within the principle of those cases where there is only a single name to designate the new article, or where the new name is used merely as descriptive of the article. Defendant's theory that where a suggestive trade-mark has been adopted, another desiring to obtain the benefit of the trade-mark may coin a word not already in the language and not made according to the regular rules for coining new words, yet sufficiently indicative of the quality and character of the article to be invalid as a trade-mark and sufficiently like the trade-mark in

use to obtain benefit of an infringement, seems to open the door for ingenious fraud.

Under the circumstances of this case the conduct of the defendant in rejecting all existing names, and in coining a new name which conveys to the eye and ear so closely an imitation of complainant's trademark, seems to indicate a design to impose his article upon the public as that of the complainant, or at least to obtain the substantial benefit of complainant's trade-mark.

It is well settled that the inventor of an arbitrary or fanciful name may apply it to an article manufactured by him to distinguish his manufacture from that of others, and that the subsequent use of such word by the public to denote the article does not deprive the originator of his exclusive right to its use.

Neither does the fact that the defendant sold under its own name, and made no attempt other than by the use of the word "Cottlene" to palm off his goods as those of the complainant, constitute a defense.

Against the Bell Telephone.

The long contested patent suit of the United States vs. the American Bell Telephone Co., was ended at Boston on the 18th, when Judge Carpenter of the United States Circuit Court, rendered a decision in favor of the telephone company. This suit was a bill in equity praying for the repeal of letters patent issued to Emil Berliner, assignor of the American Bell Telephone Co., for a combined telephone and telegraph system. The case has been in the court for a number of years and is already familiar to the public. The Berliner patents were issued to the telephone company, but never put into use by them on account, they claimed, of the expense of making changes in the telephone system, while other companies were prevented from using the system.

The first ground of the bill brought by the complainants in this suit is that the patent is void, it being beyond the power of the commissioner to issue. On this point the decision of Judge Carpenter declares:

"It appears that one of the functions of the device shown in the patent of 1880, namely, the function of transmitting articulate speech, is identical with the sole object or function of the device covered by the patent of 1891, and that the device for effecting the transmission of sound is identical in both patents. The patent, therefore, seems to me to be void and beyond the power of the commissioner to issue."

"The second ground in the suit is that the issue of patent was unlawfully delayed through the fault of respondent. The respondent corporation was of ample means to prosecute the application. The result of any delay which might take place in the issue of the Berliner patent would evidently be to continue so much longer the practical monopoly of the art of electrical transmission of articulate speech. Under the circumstances, I think it clear that the duty of the respondent corporation was to use the greatest degree of diligence in prosecuting the application to an early issue."

The application for which an interference was anticipated was that filed July 26, 1890, by Daniel Drawbaugh, in which he claims to be the original inventor of the telephone. There was set on foot a general understanding as it is called, on the part of the examiner and the respective counsel for Drawbaugh and for the Bell company, that the decision for the application for the Berliner patent should await the decision of the court on the interference. It would never appear in the patent office that Drawbaugh was entitled to a patent. The plain duty of the respondent corporation was, as it seems to me, to insist on its right to a patent at once. That the unwarrantable delay thus caused was intended by the respondent corporation, I can have no doubt.

"I think that these facts were so gross as to forbid any inference, except that they dishonestly delayed the issue of the patent, taking advantage for that purpose of the office of the patent office to postpone the decision of a sharply debated question in which large public interest was involved. My conclusion, therefore, is that the complainant has made out the case and that there should be a decree that the patent in question was void and shall be delivered up and canceled."

Chinese C-ron Pocket Stoves.

Are a always necessary in every household. Physicians recommend them and the tired mother needs them as ever. They are without cost. No smoke. No smell. They are small, light, and portable. They are sold for 60 cents. Agents wanted to whom we give exclusive territory. Address, WESTERN NOVELTY CO., Lakota, N. Dak.

Never use.

To cleanse the blood. There is no better remedy for this than Dr. Kermott's Mandrake Pills. They have been in use for over thirty years and are compounded of simple roots and herbs in a highly concentrated form. Their action is mild and gentle. Try them, 25c. Sold by Kinsel Bros., druggists.

"A Word to the Wise is Sufficient."

I suffered terribly from roaring in my head during an attack of catarrh, and became very deaf, used Ely's Cream Balm and in three weeks could hear as well as ever.—A. E. Zimmerman, Grayling, Mich. "One of my children had a very bad discharge from the nose. Physicians prescribed without benefit. After using Ely's Cream Balm a short time the discharge was cured.—O. A. Cary, Corning, N. Y. Price of Cream Balm is fifty cents.

Detroit Markets.

The following quotations are copied from the Detroit Free Press: Apples, \$2.25 to \$2.35 per barrel. Butter, 1/2 to 3/4 per pound. Cattle, 10 to 12 per head. Hogs, 10 to 12 per head. Flour per barrel, \$2.25 to \$2.35. Grain, 10 to 12 per bushel. Lard, 10 to 12 per barrel. Pork, 10 to 12 per barrel. Sugar, 10 to 12 per barrel. Tea, 10 to 12 per pound. Coffee, 10 to 12 per pound. Rice, 10 to 12 per bushel. Beans, 10 to 12 per bushel. Corn, 10 to 12 per bushel. Potatoes, 10 to 12 per bushel. Onions, 10 to 12 per bushel. Carrots, 10 to 12 per bushel. Turnips, 10 to 12 per bushel. Cabbage, 10 to 12 per bushel. Lettuce, 10 to 12 per bushel. Spinach, 10 to 12 per bushel. Broccoli, 10 to 12 per bushel. Cauliflower, 10 to 12 per bushel. Asparagus, 10 to 12 per bushel. Peas, 10 to 12 per bushel. Lentils, 10 to 12 per bushel. Chickpeas, 10 to 12 per bushel. Mung beans, 10 to 12 per bushel. Soybeans, 10 to 12 per bushel. Sesame seeds, 10 to 12 per bushel. Flax seeds, 10 to 12 per bushel. Hemp seeds, 10 to 12 per bushel. Sunflower seeds, 10 to 12 per bushel. Cotton seeds, 10 to 12 per bushel. Linseed, 10 to 12 per bushel. Castor oil, 10 to 12 per barrel. Olive oil, 10 to 12 per barrel. Coconut oil, 10 to 12 per barrel. Palm oil, 10 to 12 per barrel. Peanut oil, 10 to 12 per barrel. Corn oil, 10 to 12 per barrel. Soybean oil, 10 to 12 per barrel. Sesame oil, 10 to 12 per barrel. Flax oil, 10 to 12 per barrel. Hemp oil, 10 to 12 per barrel. Sunflower oil, 10 to 12 per barrel. Cottonseed oil, 10 to 12 per barrel. Linseed oil, 10 to 12 per barrel. Castor oil, 10 to 12 per barrel. Olive oil, 10 to 12 per barrel. Coconut oil, 10 to 12 per barrel. Palm oil, 10 to 12 per barrel. Peanut oil, 10 to 12 per barrel. Corn oil, 10 to 12 per barrel. Soybean oil, 10 to 12 per barrel. Sesame oil, 10 to 12 per barrel. Flax oil, 10 to 12 per barrel. Hemp oil, 10 to 12 per barrel. Sunflower oil, 10 to 12 per barrel. Cottonseed oil, 10 to 12 per barrel. Linseed oil, 10 to 12 per barrel. Castor oil, 10 to 12 per barrel. Olive oil, 10 to 12 per barrel. Coconut oil, 10 to 12 per barrel. Palm oil, 10 to 12 per barrel. Peanut oil, 10 to 12 per barrel. Corn oil, 10 to 12 per barrel. Soybean oil, 10 to 12 per barrel.
